

Trolleys

FOR LIGHT MATERIALS HANDLING

Ergobjörn

Trolleys for internal materials handling

For almost half a century Ergobjörn trolleys have simplified work and contributed to profitability in companies that require internal handling of lighter goods.

The simple trolley, based on which the company was founded, is still a big seller. It has been improved considerably down through the years and has been equipped with a number of intelligent solutions to increase its area of application. Our range of trolleys is continuously increasing as we fulfil the specific requirements of individual customers. We now also produce motorized trolleys and we currently have approximately 600 trolleys in our standard range. By combining these with various types of accessories, thousands of different variations can be created. If, against all odds, you cannot find the trolley you require, we will be happy to design a customized trolley to suit your specifications.

The Ergobjörn trolley is manufactured according to a module system in several different series. The wide choice of wheel types and wheel sizes, among other things, creates considerable flexibility and makes it easy to adapt the trolley to the situation. The features of the trolleys in the different series are presented in more detail on pages 10 and 11.

Ergobjörn stands for trolleys with good ergonomics and high quality. We can honestly say that no other manufacturer takes as much trouble as we do to ensure that all the components function well together for long-term use. The result is trolleys that last, that are easy to change and that look attractive for many years. No other manufacturer offers the life-long guarantee that you get with your new Ergobjörn trolley.

Choose Ergobjörn for!

- Life-long guarantee
- Over 500,000 sold in more than 60 countries
- Most durable surface treatment on the market
- Module system – available in a more or less unlimited number of variations
- Trolleys that roll easily and in all directions carrying various loads
- Adjustable handles
- Shelves that can be changed and adjusted in height
- Wide range of accessories

Trolley Types

1 Shelf trolleys

Easy to manoeuvre, robust and attractive trolleys for all types of loads. Available with shelves in 63 different sizes.

2 Step trolleys

Collapsible steps facilitate picking at higher levels. Available with shelves in 24 different sizes.

3 Platform trolleys

Practical trolley for transporting stackable goods in narrow spaces. Available with shelves in 30 different sizes.

4

5

6

4 Parcel trolleys

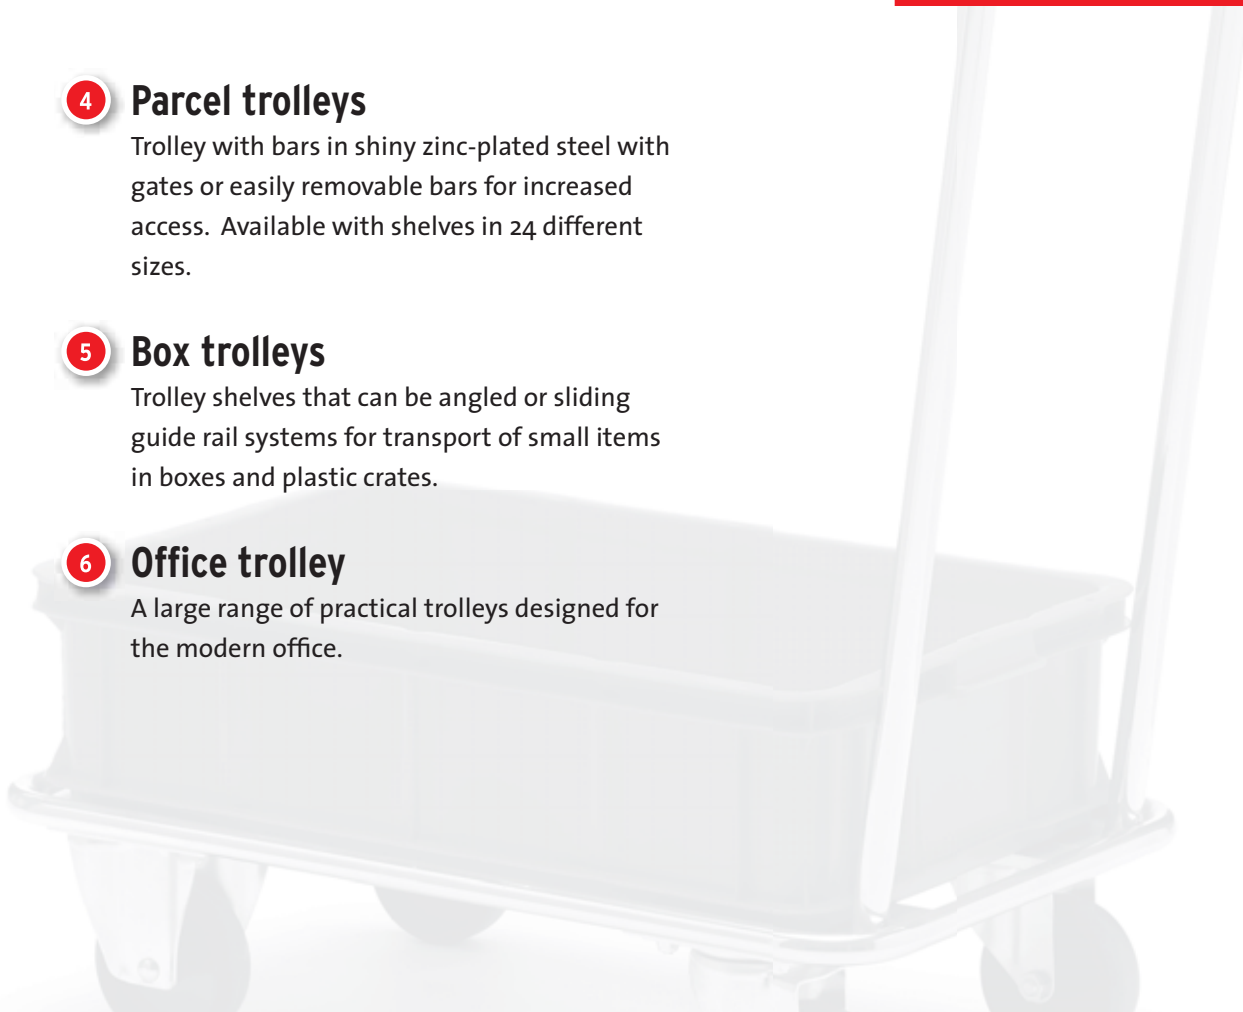

Trolley with bars in shiny zinc-plated steel with gates or easily removable bars for increased access. Available with shelves in 24 different sizes.

5 Box trolleys

Trolley shelves that can be angled or sliding guide rail systems for transport of small items in boxes and plastic crates.

6 Office trolley

A large range of practical trolleys designed for the modern office.

Trolley Types

7 Table trolleys

Simple high-quality trolley in varnish or chrome finish. Available with shelves in various wood finishes.

8 Bikes and Scooters

2 or 3 wheel bike models for fast transport covering long distances. Available with or without a platform. Motorized model also available.

9 Motorized trolley

Ergonomics and productivity are further improved with an electric engine under the trolley. The engine does not take up any loading space. Scooters available with electrically height adjustable platform.

10 ESD trolley

Special ESD trolley for environments with specific demands. The trolleys are constructed to safely conduct static electricity and are tested and approved by the Swedish National Testing and Research Institute.

Customised Trolleys

11 Customized trolleys

We have extensive experience of adapting the construction of the trolleys to suit the specific requirements of our customers.

12 Other trolleys

We have numerous types of trolleys for specialized areas of application. Here you will find stainless steel trolleys, mini trolleys, box trolleys, dollies, clothes rail trolleys, refuse bag trolleys, etc.

Accessories

Our trolley series

Ergobjörn is produced in several different trolley series which differ primarily based on the areas of application and load capability.

The trolleys within each series are produced from a number of modules. Based on the modules it is possible to create a wide range of trolleys and also to produce customized trolleys that solve specific tasks in the best possible way.

You can see here what distinguishes the different product series and the types of trolley they represent.
